EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Briana O'Regan on 1/5/04.

The application has been amended as follows:

In the specification:

The following paragraph has been inserted on Pg 1, before line 1:

—This application is a divisional of U.S. Patent Application Serial No. 09/111,447 filed July 8, 1998, now U.S. Patent No. 6,355,343.—

In the claims:

Cl 27, In 11: the phrase —, wherein the silicone release coating layer is adapted to receive the curable material, to provide acceptable release of a cast film of the curable material, and to allow the surface effect to be substantially replicated in the cast film— has been inserted after "layer".

Cl 37, In 14: the phrase —wherein the continuity of the silicone release coating layer is maintained, acceptable release of a cast film from the silicone release coating is achieved, and alteration of the underlying desired surface effect is minimized— has been inserted after "layer".

CI 43, In 1: the phrase "or 37" has been deleted.

2. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor renders obvious all of the claimed limitations. Furthermore, the instant claims are commensurate in scope with the patented claims of the parent application (09/111447, now USPN 6355343).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents illustrate the state of the art: Chou (USPN 6309580); Birch et al (USPN 656398); Chou (USPN 5772905); Kano et al (USPN 6193898); and Shvartsman (USPN 5279689). The U.S. Patents cited on the parent patent (USPN 6355343) also have been considered and they are: Gray et al (USPN 4289821); Mattox (USPN 4311766); Gray et al (USPN 4322450); Gray (USPN 4327121); Lopes et al (USPN 4681714); Blenkhorn (USPN 4840757); Thorfinnson (USPN 4876153); Kidai et al (USPN 5518818); and Choquette et al (USPN 5861113).
